

Liam Patel

DevOps Engineer | liam.patel@devmail.com | +1 555-678-1234 | Seattle, WA

Professional Summary

Detail-oriented DevOps Engineer with 4+ years of experience automating infrastructure, managing CI/CD pipelines, and ensuring high availability of cloud-native applications. Expert in container orchestration, infrastructure as code, and cloud platforms including AWS and Azure. Skilled in streamlining development and deployment workflows for fast, reliable releases.

Technical Skills

- Configuration & Automation: Ansible, Terraform, Bash, PowerShell
- CI/CD: Jenkins, GitHub Actions, GitLab CI/CD
- Containers: Docker, Kubernetes, Helm
- Cloud: AWS (EC2, ECS, EKS, S3, RDS), Azure DevOps
- Monitoring: Prometheus, Grafana, ELK Stack, CloudWatch
- Version Control & Collaboration: Git, Jira, Confluence

Professional Experience

DevOps Engineer | SkyScale Systems | Seattle, WA

May 2022 - Present

- Designed and implemented CI/CD pipelines using Jenkins and GitHub Actions for microservices deployment.
- Managed Kubernetes clusters using Helm for enterprise-scale applications.
- Automated cloud infrastructure provisioning with Terraform on AWS and Azure.
- Developed monitoring and alerting dashboards with Prometheus and Grafana.
- Conducted security audits, applied IAM best practices, and configured automated backups.

DevOps Engineer | liam.patel@devmail.com | +1 555-678-1234 | Seattle, WA

Associate DevOps Engineer | NetFlux Solutions | Seattle, WA

Jun 2020 - Apr 2022

- Containerized legacy applications using Docker and deployed via ECS and Kubernetes.
- Maintained CI/CD pipelines using GitLab CI and Ansible for on-prem deployments.
- Collaborated with developers to improve code integration and build reliability.
- Implemented log aggregation and monitoring using ELK stack and AWS CloudWatch.

Education

B.S. in Computer Engineering | University of Washington | Graduated 2020
